

# CORONAVIRUS PANDEMIC PROTOCOL for Families

*We ask families to follow the CDC GUIDELINES to protect themselves and others.  
We will work together to keep our Girls Inc. community safe and healthy.*

## Drop Off & Pick Up

- Please let staff know you will be picking your child up early at the time of drop off.
- Families should remain in their vehicles while dropping off/picking up children, unless otherwise directed by camp staff.
- Children are separated by units and travel together throughout the day to each learning circle:
- We will not allow campers with Covid-19 symptoms to remain on the premises during the camp day.
- Parents should screen children for fever/illness daily before drop off.
- If a child becomes sick at camp, they must be picked up immediately upon notification. If immediate pick up is not feasible, please assign an alternate pick-up person to be contacted.

## Wellness

- Anyone with known COVID-19 contact shall ***immediately*** inform the Program Director of Girls Inc., who will then notify all families and contact the Health Department for closure guidance if necessary.
- For those with a ***confirmed positive exposure and no symptoms***: DPH protocol is to isolate for 5 days after your exposure, test 24 hours after your exposure and take a second test on day 5. If test results are negative, you can return to camp on day 6 with proof of negative results. For example, your exposure is considered day 0 - if you are exposed on Monday, you should test on Tuesday (day 1) and Saturday (day 5) - if results are negative you can return to camp on the following Monday. (At home tests are available at Girls Inc. as needed).
- For those with ***confirmed positive exposure and symptoms***: DPH protocol is to isolate immediately, test upon symptoms beginning and test upon symptoms resolving. If negative, the camper can return to camp 24 hrs after being fever-free or symptoms significantly improved.
- For those who test positive: Isolate for at least 5 days. Return to camp day 6 (at the soonest) or when fever-free for at least 24 hours or symptoms significantly improved. Mask wearing required up to day 10.
- If anyone in the household is exhibiting symptoms please keep your child(ren) home until Covid-19 can be ruled out.
- If your child has traveled by means other than car please see Program Director for quarantine and testing guidelines.
- Children with a low-grade temperature will be sent home and must remain fever free for 72 hours without use of medication to return.
- Children with a cold/allergies, coughing, runny nose, or sneezing will not be permitted to attend camp.
- Children complaining of a sore throat must remain out of camp for 48 hours and may return with a Doctor's note.
- Children with a rash must remain out of the camp and may return with a Doctor's note.
- If siblings attend and one is excluded due to a positive Covid-19 result all siblings must remain home until all can return.

## Provisions

- Girls Inc. will provide water throughout the day to all campers.

Girls Inc. camp staff follow guidelines provided by the Office of Early Childhood, and will provide updated changes to current protocols as they occur.

I hereby attest that I have been informed of the following pertaining to the coronavirus and that I will follow all policies and procedures set forth by Girls Inc.:

- People who are 65 years and older and people of any age who have serious underlying medical conditions or are at higher risk for severe illness from COVID-19 are recommended to stay at home. A list of medical conditions associated with a higher risk for severe illness from COVID-19 can be found in CDC's guidance.
- Individuals and families should consult their healthcare provider to determine whether they have medical conditions that place them at risk
- Staff and children living in households with individuals who are 65 years and older OR have higher risk for severe illness from COVID-19 are recommended to stay home

Protocols and are subject to change in accordance with new guidelines put forth by the OEC, DPH or CDC
